

I am opposed to NBA's petition 04-160. It limits the market place from providing a service to the public. It is somewhat like the newspapers lobbying to prevent radio from providing a similar service when radio was first introduced.

I found having traffic and weather reports for cities I was travelling through an a recent cross country trip very helpful and available when ever I needed that information. It is a valuable service that I pay for.

I trust that you will reject the NAB's petition 04-160 and allow the continuation of this service by satellite radio.
